

Easily Manage Credit Card Accounts with the FIS TBS Connector

The FIS TBS connector allows credit card fulfillment requests and update information to be easily transferred daily, in a batch format, from the Temenos Loan Origination module to TBS.

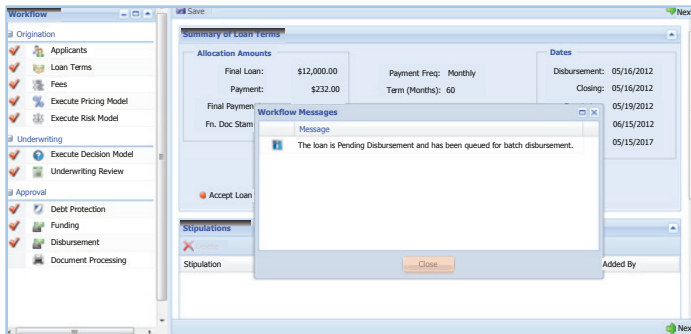

Key Features

Single Platform Processing

The TBS connector provides the ability to request new credit card accounts, increase credit limits, or add new authorized users without having to leave the System.

Quickly Decision and Fulfill Requests

Loan officers can process applications and requests, as well as provide immediate decisions, using the loan origination module's customizable workflow and powerful decision engine. Daily, all new credit card service requests are automatically sent to TBS for fulfillment and processing.

The Loan Origination module allows you to transfer all the applicant information seamlessly to TBS with just a few clicks!

Benefits

Reduce Redundant Data Entry

Information from the Temenos and TBS databases allows screens to be pre-populated, eliminating human error and the need for double data entry.

Increase Efficiency

The TBS connector eliminates the need to toggle between multiple software applications to place credit card service requests.

Improve Service Quality

Quickly respond to account holder credit card service request, and feel confident that the requests will be fulfilled in a timely manner.

More Information

System Requirements

Version 10.29 or higher must be installed in order to use the TBS connector.

For more information about the TBS connector, please contact your Temenos Account Manager or FIS Account Representative.
