

Access Vehicle Valuation Data with the NADA Connector

The **NADA** connector allows users to retrieve vehicle market values from NADA, an industry leader in vehicle valuation, products, services, and information, directly through the Temenos Loan Origination module.

Key Features

Obtain Real-Time Information

Vehicle value information from NADA can be conveniently accessed in real-time using the NADA Calculator right from the Loan Origination module.

Include NADA Values in Each Application

The NADA Calculator can be built into the application process to ensure market values are included with each record. The information is then saved within the Loan Origination module and can later be referenced by loan processors and underwriters.

Access Values at Any Time

The NADA Calculator can be made available at a designated point in the application process or by selecting it from a menu on the main application tool bar.

Easily Update Information

Vehicle information for each application can be modified and updated at any time on an as-needed basis.

Benefits

Save Time

Eliminate time spent on duplicate data entry and shifting between more than one program. All necessary NADA calculation tools can be accessed directly within the Loan Origination module.

Reduce Costly Errors

Avoid errors caused by manual vehicle value look-ups and reduce mistakes that can result from copying data from one program to another.

Information at your Fingertips

Electronically obtain vehicle book values in real-time while speaking with a customer or processing an application.

More Information

System Requirements

Version 10.24 or higher must be installed in order to use the NADA connector.

Provider Highlight

Over a 79-year history, NADA Used Car Guide has earned its reputation as the leading provider of market-reflective vehicle valuation products, services and information to businesses throughout the U.S. and worldwide. NADA Used Car Guide delivers weekly auction values, plus monthly trade-in, loan and retail values. For more information, visit www.nada.com.
