

Streamline the Creation of Credit Card Accounts with the PSCU Connector

Integrated to the Loan Origination Module

The PSCU connector allows credit card fulfillment request and update information to be transferred directly between Temenos Infinity and PSCU.

KEY FEATURES

Seamless Connection

The PSCU connector supplies a seamless connection between PSCU and Temenos Infinity. When a loan is approved and disbursed, all information is automatically transmitted to PSCU where requests for new credit card accounts, increased credit limits, or additional authorized users can be easily processed.

Support of Multiple Products

Temenos Infinity's dynamic rules engine can support an endless number of credit card programs. Data such as card type, card design, and over the limit fees can be customized for each card offering and transmitted directly to PSCU with this connector.

Real-Time Communication

This connector provides a real-time connection between Temenos and PSCU. Credit card request are instantly transmitted for timely processing.

BENEFITS

Reduce Data Entry

Information from Temenos Infinity is automatically pre-populated in PSCU for account creation and servicing, eliminating human error and the need for double data entry.

Increase Efficiency

The PSCU connector eliminates the need to toggle between software applications to manage credit card service requests.

Decrease Processing Time

A real-time connection between Temenos and PSCU allows for a quick turnaround on credit card service requests which can improve account holder satisfaction and ensure processing time is kept to a minimum.
