

Seamless integration with Temenos T24

Implementation of QUALCO® Collections & Recoveries™ & integration with Temenos T24 Core Banking System

Client

STOPANSKA BANKA AD - SKOPJE
member of NBBG group

Stopanska Banka is a Bank with the longest tradition on the Macedonian market. Founded as the first bank in 1944 Stopanska banka set the foundations of banking and is still the leader in the development and implementation of the most sophisticated financial products and services for the retail and corporate segment operation in FYROM. In 2000 the bank was bought by **National Bank of Greece Group**.

Business Needs

To **centrally implement** a blueprint collection platform allowing at the same time the **agility and flexibility for localizations**. Support collections while lending is increasing.

Solution

QUALCO® Collections & Recoveries™ platform implementation with local customizations to address the bank's specific needs.

Support early, late & legal portfolio management.

Results

- Full loan, cards products implementation with a wide set of best business practices
- Seamless integration with Temenos T24
