

Access Data and Analytics with Experian Collection Advantage

Integrated to the Collection and Recovery Modules

The Experian Collection Advantage connector is an all-in-one tool offering easy access to Experian credit-based scoring, consumer contact data and analytical services all through Temenos Infinity.

KEY FEATURES

Easily Request Key Information

Through this batch integration, users have the ability to request scores, tradeline details, credit attributes, bankruptcy/deceased indicators and current contact data, all in one flawless delivery.

Utilize Existing Functionality

Institutions will be able to use the system's export functionality to determine which accounts are sent to Experian based on criteria, the schedule of when the accounts should be sent, and what data is requested from Experian.

View and Manipulate Results

All results will be imported directly into Temenos Infinity and displayed on an account-level screen. Also, the 33 credit attributes and model scores will be available in the field list allowing institutions to use the data in reports, queues, searching and criteria building.

BENEFITS

The existing integration can provide many important benefits to your institution.

Proactively Gather Account Information

Through the Collection Advantage connector, institutions can access credit-based scoring, segmentation, and locator information early in the collection process when it is most valuable.

Improve Productivity

Since Collection Advantage is fully integrated with the platform, this all-in-one tool gives you quicker access to critical information for greater productivity and improved profitability.

Improve Analysis and Reporting

Model scores and the 33 credit attributes received from Experian are available for building collection queues and reports.

MORE INFORMATION

System Requirements

Version 9.04 or higher must be running in order to utilize the Collection Advantage connector. Some new features may also require that the latest version of the system be installed.
