# codat

Allow your customers to integrate their transactional data with their accounting software

Providing connectivity between the financial platforms that your customers use to run their business

» Provide customers with the type of digital experience and connectivity they have come to expect
» Give your customers back their valuable time so that they can focus on growing their businesses
» Faster, simpler and less expensive than building integrations in-house
» A fully white labelled solution

Data sources include

sage   intuit quickbooks.   KashFlow Accounting Software   FreeAgent   Reckon R

tide.

"A wide variety of accounting integrations is a simple requirement for a modern business banking service like Tide. Codat has helped us achieve that requirement several years more quickly than we otherwise would have."

Ali Travis, VP Business Services

How it works

Authorisation
Connectivity to each accounting platform made easy using Codat's standard API

Insertion
Transformed data is inserted into the different accounting platforms used by your customers

Transformation
Codat handles the mapping and grouping of data to the correct format

Synchronisation
Allow your customers to choose how and when their data is synchronised from within their banking app

For more information on how Codat can help your business or to arrange a demo please contact
