WHO WE ARE.

“Jiway is first of all a human adventure, the story of four friends who had the daring to embark on entrepreneurship.

Starting with well-designed reports required by ever-more demanding investor clients, Jiway has moved ahead to adapt to evolving market needs as well as responding to a growing demand from financial and private industries key players.

30 years later, the Jiway team is still driven by the same “start-up spirit”, innovation as a spearhead.

As a software editor, Jiway focuses on the delivery of flexible business solutions, adapted to client’s needs and expectations. At the service of private and global banks in Luxembourg and across the world over the last 18 years, Jiway has become a leader in the fields of document and business relationship management.

With the digital transformation and increased needs for accessing information from anywhere at any time, it became natural to develop for our clients a customizable information exchange platform, made today available for any business activity sector. ”
