Temenos Wealth

The de facto Solution for the Wealth Industry

With clients among the largest global financial institutions and boutique firms, Temenos Wealth is the de facto software solution for the Private Wealth Management (PWM) industry. It enables differentiation through superior digital & front-office capabilities, delivers cost reductions with core automation and leverages the latest technology. It supports your end-to-end digital transformation with a composable front-to-back architecture.

The Opportunity in Wealth Management

A new generation of investors: Technological advancements, the acceleration of digital transformation, and the generational transfer of wealth to younger customers are prompting PWM firms to evolve and innovate as they are no longer the only choice for investment.

Hyper personalization: Leveraging technology, data analytics, and AI, the most sophisticated firms can offer customized products and services based on their customer knowledge.

New instruments and regulations: New types of investments are emerging, like digital assets—i.e., cryptocurrencies and NFTs, now seen as a diversification option. More importantly, driven by EU regulations and growing concerns over sustainability, ESG investments are bound to have a significant impact on portfolio allocations in the coming years.

Cloud & SaaS: PWM remains a staff intensive business with a traditionally high cost/income ratio. Turning to the Cloud and Software-as-a-Service Wealth Managers can adapt their IT cost model and protect their margins.

“With Temenos Wealth, we are confident of achieving our ambition in offering the most innovative wealth management products and services in the industry.”

ABN AMRO
The Challenges

**Changing customer expectations**

- Hybrid digital interactions and omnichannel customer experience are not an option anymore but the new norm.
- Across segments, clients expect competitive prices but also greater personalization, and new asset types like sustainable investments or digital assets.

**High costs**

- In a high-touch business where wealth progressively transfers to new generations, client acquisition, and retention are expensive.
- “Change the bank” costs to adapt to new needs are very high on legacy IT platforms.

**Time to market**

- Firms must constantly innovate to keep up with competition from their peers and new digital players.
- New regulations including investor protection, taxation and reporting require constant adaptation within limited timeframes.

**IT Complexity**

- Most wealth management firms lack the scale to build in-house solutions. Analytics and AI projects are complex and risky. Digital assets and blockchain requires specific expertise.

High performing banks spend a higher proportion of IT budget on growth and innovation.

*McKinsey Digital 2020 benchmarks*  
Note: Maintenance includes existing business (keeping the lights on) and non-discretionary regulation.
Temenos Wealth is an end-to-end solution made of best-of-breed standalone components that deliver an integrated, omnichannel solution to wealth managers and private bankers. It covers digital banking, customer relationship management, portfolio management, back-office processing, market data management, analytics, and XAI.

• Delivers exceptional customer experience via a self-service offering based on a versatile low-code digital platform and experience APIs.

• Enables wealth management firms to differentiate with highly personalized services, for instance, ethical or sustainable investments or AI-augmented advice. All standard asset classes are supported, including private equity structured products, and going forward digital assets like cryptocurrencies.

• Enables advisors and portfolio managers to implement the right investment strategy and deliver transparent reporting, including performance attribution.

• Highly automated to achieve high STP rates and reduce manual intervention across the value chain.

• Helps larger banks to streamline their processes and reduce their costs via its multi-entity capabilities.

• Leverages cloud technology to lower infrastructure and operational costs, available as SaaS.

• Enables firms to target the affluent mass segment in a scalable, hybrid advisory model.

The rapid launch of our new, truly universal digital wealth platform supports our international operations and enables us to scale for global expansion in years to come.”

Private Bank International

Benefits

**Exceptional Customer Experience**
- New digital solution enabling self-service investing and hybrid advisory
- Augment client engagement with pre-integrated third party solutions

**Boosted Productivity**
- Productivity features to service one or thousands of accounts in one go
- XAI-based smart advice

**Compliance Risk Mitigation**
- Versatile pre- and post-trade controls
- Modules and Country Models to tackle international and local regulations

**High STP Rates**
- Front to back process automation, from portfolio rebalancing to trade settlement and asset servicing
- Adherence to industry standards and protocols
- End-to-end integration

**Quicker Time to Market**
- Curated ecosystem and open APIs
- Unmatched product flexibility
- Support for DevOps

**Adapted Cost Model**
- SaaS, Cloud or on premise deployment
- Scalable platform that grows with your business needs
- Strong multi-entity capabilities to streamline processes and reduce TCO
