

## Our Role In Scaling Impact

To advance impact generating investments, GreenArc offers an accredited impact management solution that goes a step further than ESG risk mitigation. We measure, report and verify the positive and negative outcomes of a firm's investments on society. Tailored for private finance markets, including credit, payments & loans, our solution provides impact measurement for financing portfolios using an accredited impact measurement framework, helping financial institutions measure and maximise the contribution of their investments towards creating positive social impact.

## What We Offer

- Global standards in impact measurement (SDG, IMP, IFC, GIIN)
- Data driven impact measurement, tracking & verification
- Impact management solution for private finance sector
- Integrated digital impact-financial reporting

## Key Benefits

Meeting **stakeholder priorities** by reflecting sustainability practices

Customised **impact analytics** on beneficiary level (SME/Individual)

**Impact rating** for consistency & comparability

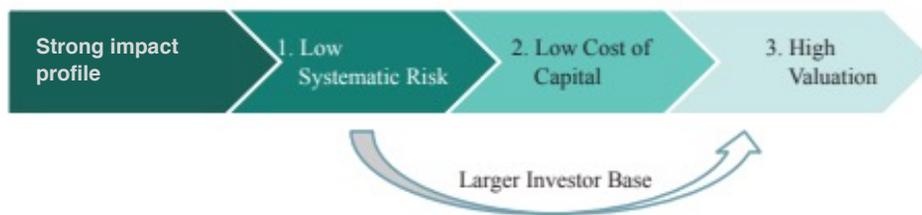

Tech enabled for **scalability**

**Credible reputation** in social & environmental governance

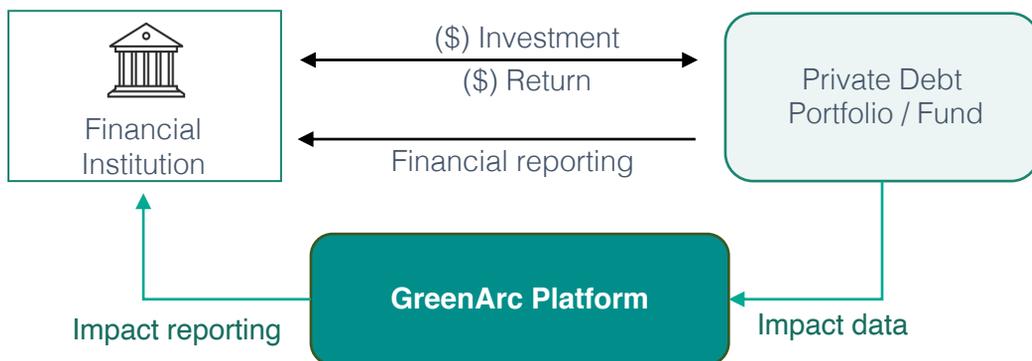

## The Value Proposition

- ★ *Develop or transition product base to be **impact / ESG oriented***
- ★ ***Access sustainability linked/green financing & impact capital markets***
- ★ ***Increase enterprise value through higher impact & ESG scores**<sup>1</sup>*

## Completed Projects For Impact Measurement & Reporting

### Background

#### Case study 1

Measurement and reporting of the social impact of credit loans disbursed by a fintech lender through a debt investment by a Japanese financial institution (JFI)

#### Case study 2

A Singapore-based \$3 bln multi family office, **Taurus Wealth**, have launched a private debt impact fund with the social objective of greater financial inclusion

#### Case study 3

A Swiss Asset Manager (AM), **iGravity**, have developed an asset allocation impact index product, requiring regular impact measurement & reporting

### Project deliverables

- Map impact strategy to the UN Sustainable Development Goals
- Measure impact metrics associated with the JFI's debt investments
- Provide impact analytics via the GreenArc Platform through customized reports
- Impact management solution to measure and report the impact of the underlying assets (loans) of the Fund.
- Industry first – impact measurement API on the APIX platform.
- Digitisation & automation of the AM's manual impact reporting processes
- Show integrated financial risk, return and impact reporting through a digital dashboard

### Benefits to client

- Credible and transparent investment level impact reporting
- Real-time impact analysis on debt investments
- Eliminated internal data collection and resource burden
- Reduced costs – no intermediaries/impact consultants required
- Insights & recommendations on how and where JFI can maximise impact of debt investments
- Credible and transparent Fund level impact reporting
- Real-time impact analysis on private debt fund
- Reduced cost and resource burden of establishing own impact methodology and reporting capabilities
- Insights & recommendations on how and where debt fund can maximise impact of debt investments
- Enabled real-time impact reporting on the index portfolio for all investors
- Eliminated manual internal data collection and resource burden
- Ability to offer index product for sale in Asia
