GENIE-WALLET

Tap on your Customers' Lifestyle Journeys

www.bank-genie.com

Facilitate a Digital Lifestyle, Secure Modes of Payment

Financial institutions are steadily moving towards digital. Financial products and services now fit within one's digital lifestyle and an increasing mode of payment in today's digital world is the mobile wallet.

Bank-Genie's innovation, Genie-Wallet, opens up more merchant access for banks and their customers.

Genie-Wallet offers the convenience of multiple payment options all within a mobile application – all the while making sure that payments are trusted and secure.

Genie-Wallet is a customer-enabled solution that facilitates contactless and secure payment options that are funded through linked bank accounts or credit cards. Payment options are NFC-based, QR codes, RFID, OTP, and loyalty programs. Implement Genie-Wallet now to reduce operational costs, expand payment options, and increase transaction volumes.

Intercept Payment Barriers, Introduce Payment Gateways

Improve Customer Satisfaction

Genie-Wallet simplifies onboarding and reduces the number of apps the customer needs for mobile payments.

Protect Customer Data and Privacy

Two-factor authentications are in place to ensure secure transactions and customer data is not disclosed outside the bank.

Reduce Operational Costs

The deployment of Genie-Wallet unlocks opportunity for the bank to upsell other products and it plugs loss of revenue to 3rd

Ease of Access

Customers can make payments simply with a few taps on their mobile phones.

KEY FUNCTIONALITIES

- Customer-Enabled
- 3rd Party Payments
- Contactless Payments
- Split Transactions
- Integration to 3rd Party Wallets
- Transfers to Wallet and Bank

RIT/ REMOTE IMPLEMENTATION TECHNOLOGY

End-to-end implementation of Genie-Wallet can be done remotely with minimal human intervention with RIT/ (Remote Implementation Technology).

Intercepting Banking Experiences

Bank-Genie drives what we call 'Interceptive Banking Experiences'.

It intercepts space by allowing the emergence of digital banking experiences in places far and remote. Bank-Genie fulfils branchless banking and remote delivery of its banking products. It intercepts time by making every banking interaction quicker, faster and easier.
