

Safeguarding Trade Transactions with Three Pillars of Security

WaveBL prioritizes the protection of trade transactions so businesses can engage and trade with confidence, knowing that their data is secured and their transactions are protected against fraud and loss

WAVEBL'S THREE LEVELS OF SECURITY

COMPANY

- ✓ Stringent measures and industry best practices for enhanced data protection.
- ✓ Comprehensive security controls for mitigating risks and ensuring secure trade operations.
- ✓ Continuous monitoring and regular audits to identify and address potential vulnerabilities.

FEATURES

- ✓ Secured identity provider to manage user authentication and prevent unauthorized access.
- ✓ Anti-virus scanning of documents within WaveBL
- ✓ Sustainability by implementing built-in rate limits within a highly available infrastructure

PROTOCOL

- ✓ Decentralized and tamper-proof blockchain to ensure the immutability of trade records
- ✓ Advanced cryptographic techniques to fortify security measures against fraudulent attempts
- ✓ Privacy layer by design to uphold extra customer trust, ensuring confidentiality

WaveBL, for secure and trusted trade Transactions!

WaveBL is a digital platform that utilizes proprietary blockchain technology to facilitate the instant, encrypted, and authenticated transfer of unique trade documents. The platform is designed to meet the needs of all parties involved in trade and has established strong alliances with leading companies in global trade to accelerate digitalization and adoption. WaveBL adheres to universal processes and regulations in use.
