Complexity made Simple

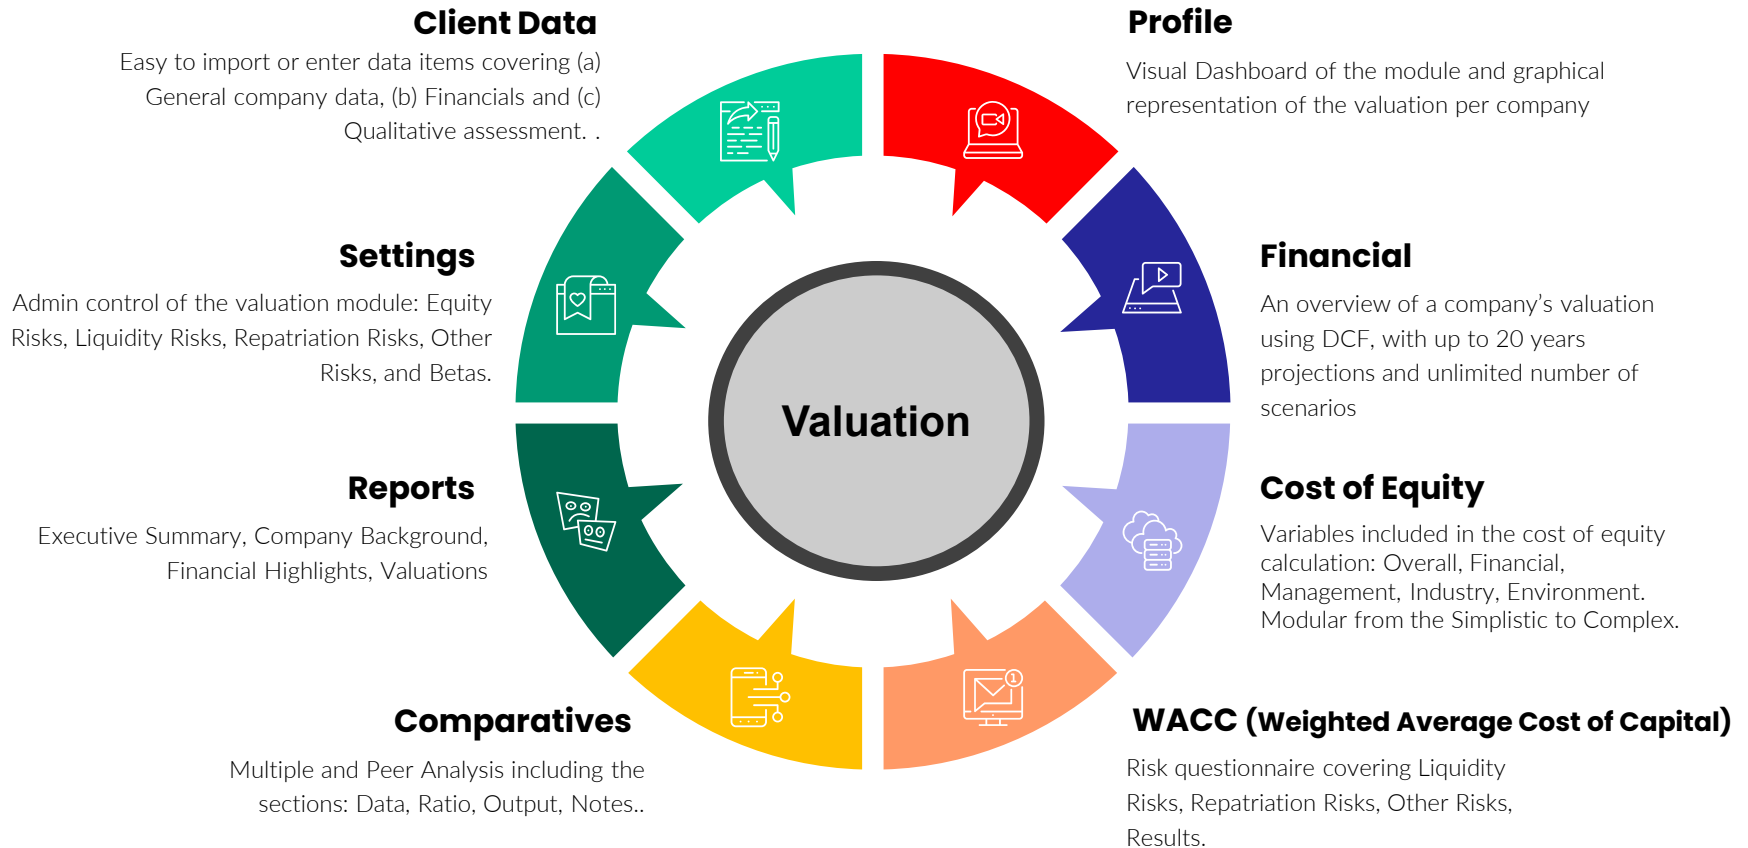

### Benefits

- |                 |                                  |
|-----------------|----------------------------------|
| 1. Efficient    | Time efficient one-stop solution |
| 2. Customizable | Easily configured                |
| 3. Accurate     | Minimizes Errors                 |
| 4. Scalable     | Large Number of Companies        |

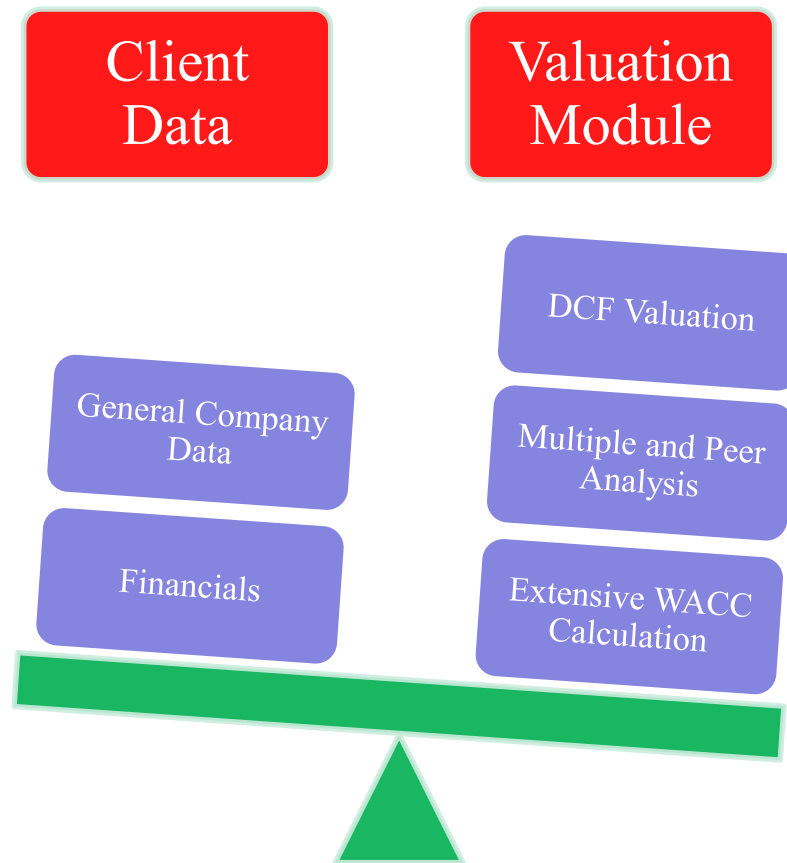

# Valuation Module Sections

## One stop solution

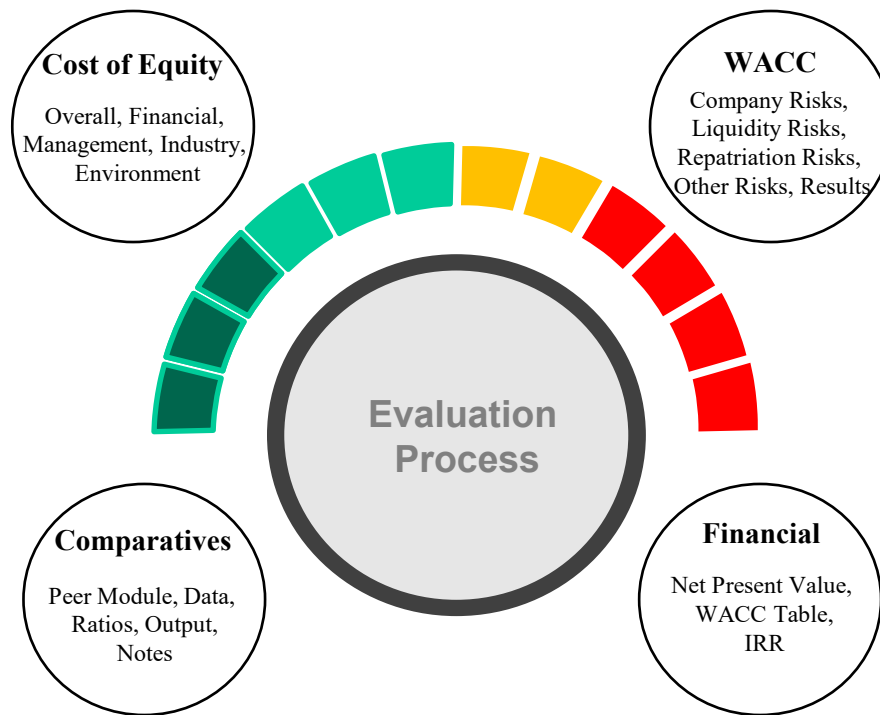

All sections required for the Valuation Process

# Evaluation of Clients: Two-part solution

The evaluation of a client holds two parts for the User: Client Data and Valuation Module

Cost of Equity takes into consideration Financial, Management, Industry, and Environment Risks

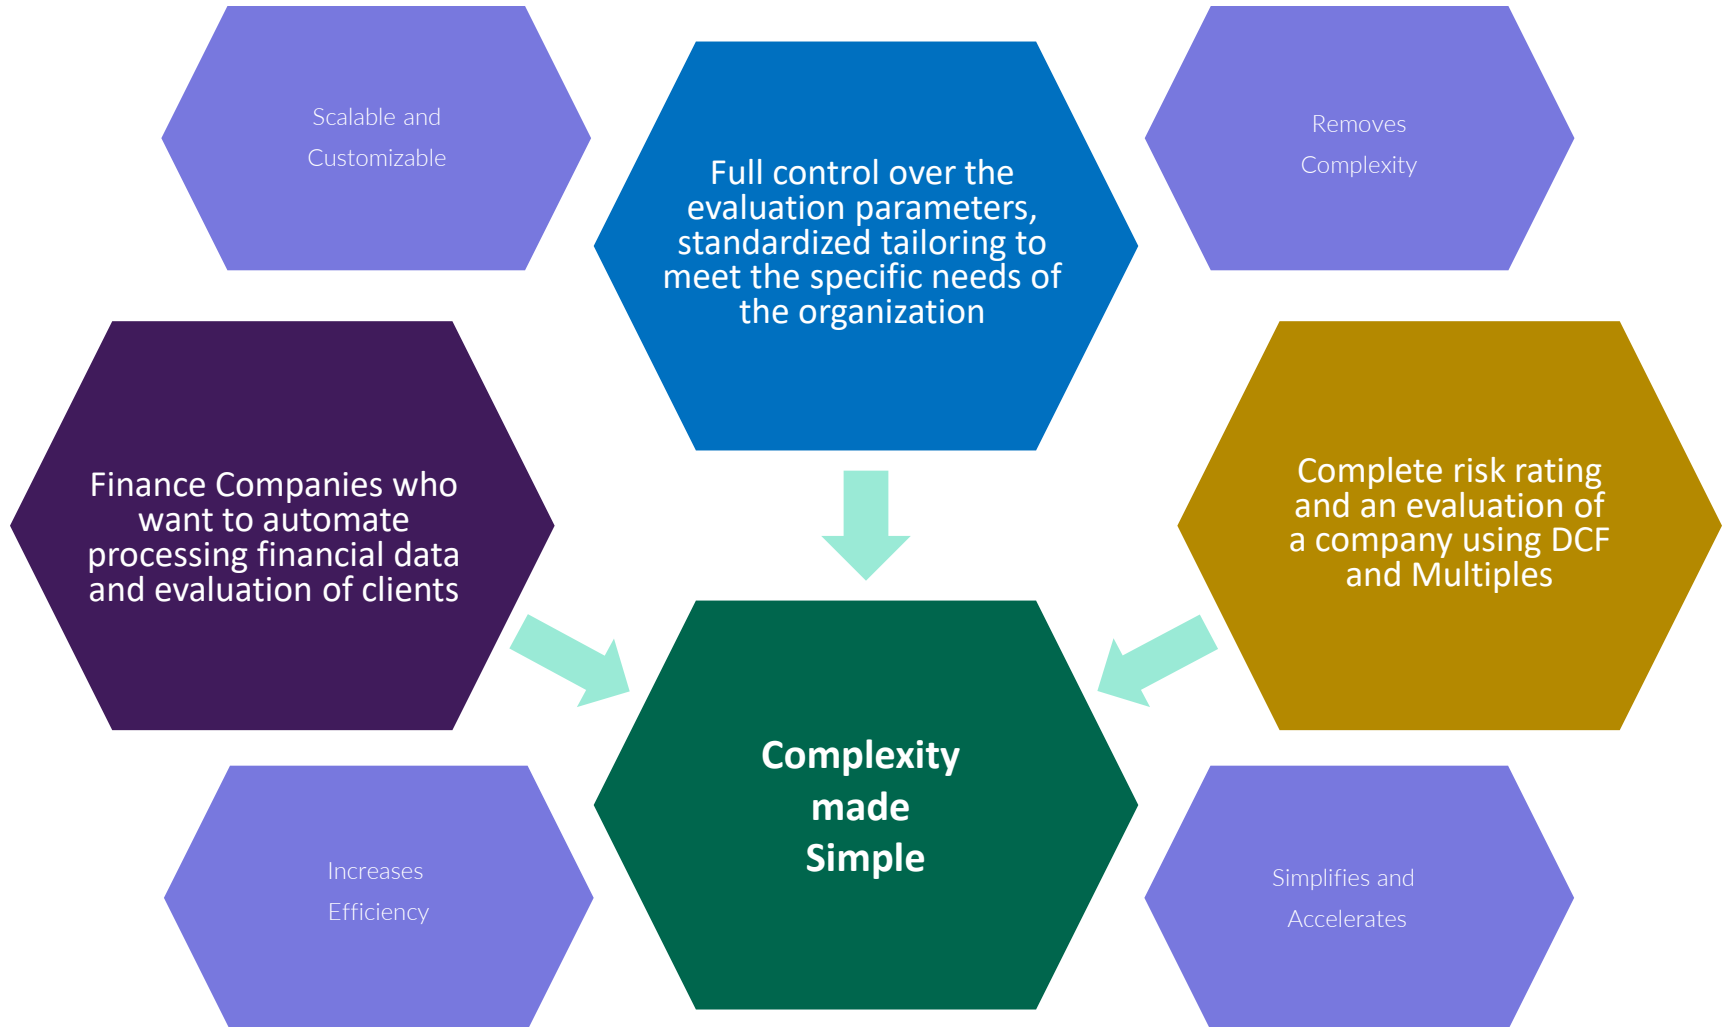

With Cost of Equity, WACC also takes into consideration Liquidity, Repatriation, and Other Risks.

WACC is used in the DCF and is compared with Peer and Multiple Analysis is also calculated.

The components used within the Valuation Module contain

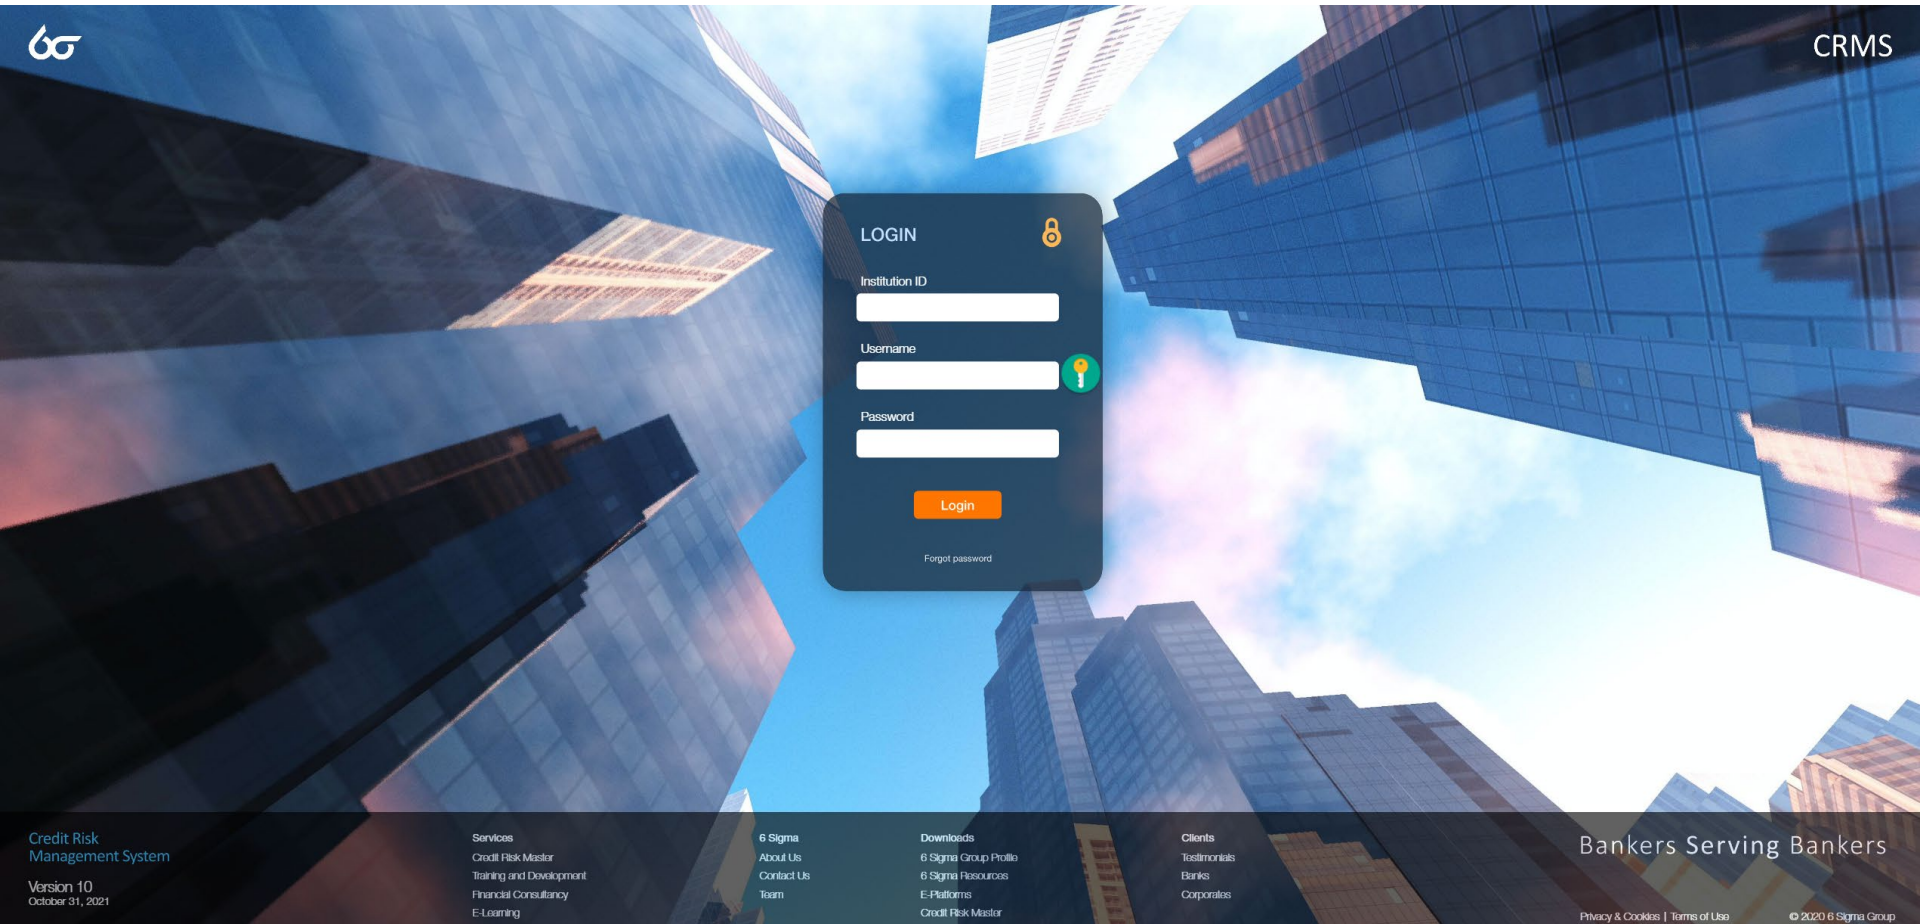

- (a) High level of due diligence
- (b) Automatic and accurate DCF calculation
- (c) Detailed Multiple and Peer analysis

## Covers a multitude of advantages
