

# Temenos Cloud

Providing instant access to  
the most extensive set of  
composable banking services

Temenos Cloud is the  
trusted SaaS in banking  
providing instant access  
to the most extensive  
set of composable  
banking services.

**temenos**

Temenos Cloud is the trusted SaaS to deliver the stringent requirements of the financial services industry and provides access to a leading breadth & depth of banking capabilities to compose exceptional experiences.

## Innovate today on the Temenos Cloud:

### **Build for change**

The Temenos Cloud enables any financial services provider to compose banking services to drive new revenue streams, Banking-as-a-Service, embedded finance, and digital transformations, ranging from greenfield initiatives to an entire core modernization.

### **Leverage Software-as-a-Service**

Leverage continually updated Temenos SaaS services. Drive down TCO, organization complexity and operational risk by relieving your teams of the management, maintenance, investments and focus of running and changing legacy technology on-premises.

### **Secure, compliant, and trustworthy**

Cloud computing for banks comes with a highly regulated environment. Since the launch of the first SaaS client in 2011, Temenos is dedicated to investing in the required controls, certifications, accreditations, support services, security and assists banks in navigating in highly complex regulatory environments.

## Temenos Cloud Benefits

### Agility and time-to-market

Open banking requires banks to connect fast and seamlessly with ecosystem partners, where they provide the agility to scale on demand, enable rapid product launches, and deploy with a click of a button.

### Continuous updates

Avoid manually installing updates and patches. Review and accept application updates and patches from Temenos Cloud. Temenos offers automated updates to easily access evolving capabilities and platform features.

### Back office processing

Temenos Cloud for Origination and Collections Suites includes automated processing of batch processes (e.g. daily import).

Temenos Support provides monitoring of process failures and works with your financial institution and cloud operations to mitigate and resolve incidents.

### Temenos Exchange

Easily integrate with third-party technologies using certified connectors or a robust API.

Our strong integration points and open technology saves you time and money by reducing system toggling and other manual processes.

### Scale and resilience

Optimized performance with scalability embedded into the platform.

Provided with 99.9% availability and active/passive resiliency plan.

Disaster recovery testing performed annually.

### Enhanced Product Support

Expedite the resolution of product support cases by eliminating the need to involve your internal IT organization in supporting troubleshooting.

Maintain a single relationship with Temenos for software and cloud hosting services.

### Proven, trusted & certified

Aligned with industry standards and regulation, Temenos is certified for ISO/IEC 27001, 27017, 27018 and SOC 1, 2, 3 reports are available.

### About Temenos

Temenos (SIX: TEMN) is the world's leading open platform for composable banking, creating opportunities for over 1.2 billion people around the world every day. We serve over 3000 banks from the largest to challengers and community banks in 150+ countries by helping them build new banking services and state-of-the-art customer experiences. The Temenos open platform helps our top-performing clients achieve return on equity three times the industry average and cost-to-income ratios half the industry average.
