Best-in-class corporate banking capabilities

Temenos Corporate & Commercial Banking is based around an integrated core banking solution with deployable components covering the key pillars of corporate banking, including Corporate Lending, Supply Chain Finance, Trade Finance, and Cash & Liquidity Management. As banks continue to streamline and consolidate back-office functions, Temenos clients can leverage a single configurable platform that standardizes products and processes, driving efficiency and consistency.

In addition to the core foundation, we continue to invest in the front-office capabilities, allowing corporates to seamlessly initiate transactions across trade finance, lending, payments, supply chain finance and cash sweeping.

Designed to meet the needs of businesses of all sizes in the corporate sector, our solution is built on the Temenos cloud-native and cloud-agnostic platform with a foundation of flexible functionality. It is complemented by comprehensive, easy-to-use design tools and best practice templates, enabling banks to introduce new services and solutions quickly.

By leveraging Temenos Corporate & Commercial Banking as a single, unified solution, financial institutions receive the tools necessary to increase operating margins while reducing capital allocations, ultimately freeing up resources and investment for greater innovation and more tailored solutions. Available for use as a SaaS solution, in the cloud or on-premise.

Key benefits

Temenos Corporate & Commercial Banking offers banks a comprehensive, agile and cost-effective solution for innovation, enabling the creation of tailored services suitable for corporate businesses of all sizes. This integrated solution addresses the critical need for automation, helping banks reduce operational cost and risk while enhancing customer service and satisfaction.

- **Seamless Cross-Product Integration:** assemble cross-product line solutions for corporate customers linking directly to their financial systems using open APIs
- **Real-Time Insights:** embedded real-time analytics giving insight into customer and business performance
- **24/7 Real-Time Transaction Accounting:** across all products
- **Cost & Risk Reduction:** high Straight-Through Processing (STP) rates significantly reducing operational costs and risk, improving overall efficiency
- **Flexible & Open APIs:** for contextually relevant solutions and seamless integration into the broader ecosystem
- **Marketplace Access:** connect with complementary providers offering services such as ERP systems, e-presentation and OCR document processing through a unified technology for Trade Finance

You're in good company

The vendor's [Temenos] strategy shows no weak spots. [...] The [Temenos] product roadmap includes the continuation of an overarching corporate banking rejuvenation program, AI-powered operations, and fine-grain banking services out of the cloud that are aligned with the concept of a lean core." The report also states, "Its reference customers reported that the system is very modular, could satisfy almost any needs or requirements, and allows a bank to differentiate."
