

Temenos Securities

Temenos Securities is a solution supporting every stage of an investment right from the order through trade, settlement, position maintenance and asset servicing. It supports real-time processing of multiple asset classes, including equities, fixed income, mutual funds, ETFs and notes. Its cloud-native and cloud-agnostic technology and architecture is exceptionally flexible. Delivered either as SaaS or on-cloud or on-premise, it enables institutions to simplify back office processes, improve operational efficiency and significantly reduce costs.

How Temenos Securities can help you

In a complex and ever-changing environment where the institutions are faced with reduced margins, increased client demand and new regulations, the need is for flexible, modular, scalable, packaged and highly automated solutions to simplify operations, adapt to sudden changes, remain compliant and minimize disruptions.

Temenos Securities is a real-time easy-to-integrate solution offering in-depth functionality across multiple asset classes and process automation that dramatically reduces overheads and costs. In parallel, it increases productivity and level of efficiency by enabling the users to quickly identify and fix STP breaks. Through its rich functionality and modern technology & architecture (Open APIs), it serves institutions of all sizes across multiple geographies.

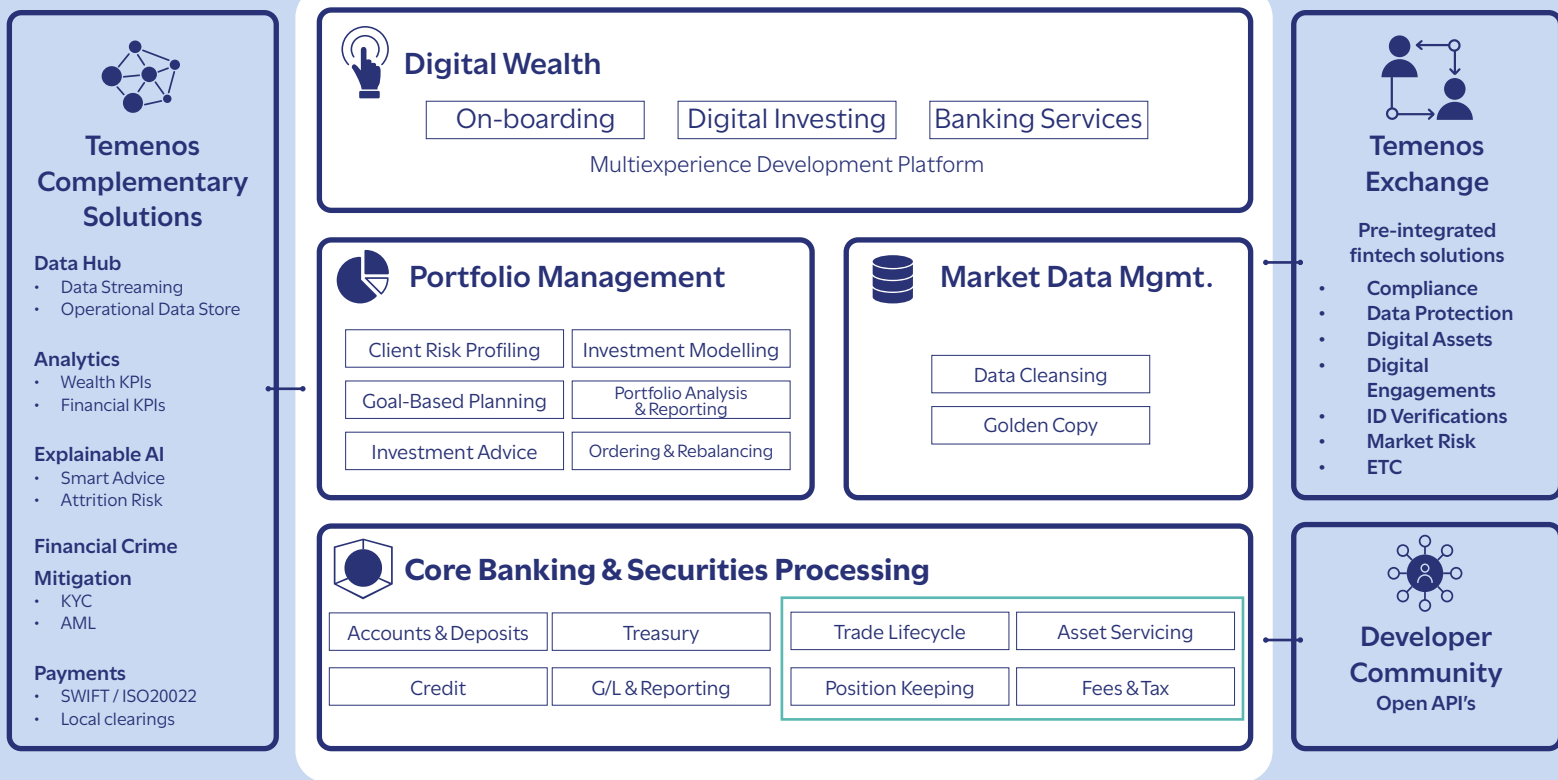

As a scalable solution, it helps banks to grow their margins and business without additional costs and meet the ever-increasing expectations and demands from customers and regulators.

What our solution covers

Temenos Transact is an industry leading core banking solution offering the most extensive and richest set of functionality around Retail, Corporate and Wealth segments. Securities Processing is part of Transact and could be deployed either along with other wealth components or as fully stand-alone.

temenos

The solution's modern architecture allied with extensive business functionality provides ample opportunity for end-to-end automation, improving efficiency and reducing costs. Its architecture allows for easy integration to Order Management Systems (OMS), Portfolio Management Systems (PMS), market data providers, custodians, fund distribution platforms, or any complementary solution providers for meeting the various client, local market or regulatory requirements. In addition to the above, Temenos also provides a standardized set of country model bank functionality that provides capability around regulatory requirements, market practices, and taxes for a specific market.

You're in good company

We chose Temenos to give is a highly efficient and highly scalable platform to support our business. To give you a measure of efficiency, we run with 99.9% straight through processing."

Lino Finini

Head of Back Office &
Banking Applications

Undoubtly, the best aspect of centralisation has been the elimination of the big discrepancy that existed in the operating costs of the different platforms. We now run an extremely lean infrastructure costs lower by approximately one third, and with IT support in the service centre representing about 5% of the total workforce."
