IMM eSign Remote Connector

temenos

Streamline the eSignature Experience

Integrated to the Account and Loan Origination Modules

The IMM eSign Remote connector makes electronic signature (eSignature) easier with direct integration to Temenos Infinity.

Key Features

Certified eSignature Connector

Reduce costs per transaction by decreasing paper generation and operating costs. IMM eSign Remote helps to execute account and loan documents faster, enabling account holders to open new accounts and start loans within minutes.

Streamlined Verification Process

The eSign Remote connector offers authentication options which enable financial institutions to easily verify the signer and validate the document integrity each time it is accessed going forward. Each option provides a greater level of assurance so the financial institution can match the option most appropriate to the transaction. IMM eSign Remote offers authentication options including email verification, share secret password authentication, and knowledge-based authentication (KBA) questions.

Ensured Compliance

Using the eSign Remote connector can help financial institutions meet compliance requirements by controlling the signing process and ensuring all information remains secure IMM eSign Remote is fully compliant with UETA and ESIGN acts as well as fully legally enforceable.

Benefits

Reduce Cost Through Efficiency Gains

Reduce costs per transaction by decreasing paper generation and operating costs. IMM eSign Remote helps to execute account and loan documents faster, enabling account holders to open new accounts and start loans within minutes.

Increased Efficiency

Use a single system to manage all online documents and signatures, as well as present pre-populated PDF documents with eSignature capabilities to account holders.

Increase Staff Productivity

The eSign Remote connector eliminates the time-consuming tasks associated with paper documents. Staff can send documents for signature to account and loan applicants instantly and set up automated reminders to progress the process. There is also no need to re-key data because eSign Remote can automatically update information from the system.

More Information

System Requirements
