

Conversational Studio

Transforming how banks deliver digital experiences

A new, effortless way to design and deliver digital banking experiences. Describe the digital journey you want in natural language, and Conversational Studio will swiftly transform intent into a production-ready application. Powered by conversational, LLM-driven development, Conversational Studio dramatically accelerates time to market, simplifies UX change, and enables continuous iteration, without months of manual coding.

Why Conversational Studio?

Banking-grade intelligence: Built on over 30 years of Temenos banking expertise and 700+ banking-specific APIs spanning accounts, payments, lending, KYC, compliance, wealth, and financial crime.

AI led, human control: AI generates code, journeys, workflows, and UI, while all other teams retain full oversight and sign-off.

Fast time to market: Move from idea to deployable MVPs in days, enabling rapid response to business priorities, regulatory change, and customer needs.

Resource optimization: Free teams from repetitive front-end build and maintenance work, redeploying skills to focus on strategy, differentiation, and innovation.

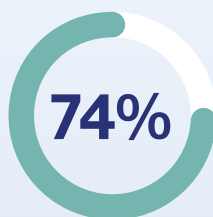

Stronger CX: Deliver modern and accessible digital journeys, refreshed frequently without disruption.

Lower delivery and change costs: Reduce reliance on large delivery teams and bespoke builds, with less rework, lower maintenance overhead, and more efficient use of resources.

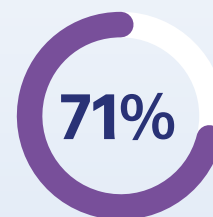

Retail banks running on Temenos Digital Banking have:

higher
cross-sell rate

lower customer
onboarding time

higher digital onboarding
completion rate

Key capabilities

Move fast: Generate prototypes in minutes and hours—not weeks—and deploy MVPs in days to dramatically accelerate delivery.

Frictionless change: Modify look and feel, interaction flows, and journeys as often as you need, without deep code changes or lengthy redevelopment cycles.

Flexible design: Start from Temenos-provided prompts or extend and customize Temenos-generated code.

Quality guardrails: Underlying contexts, system prompts, and governance rules ensure consistent, compliant, and high-quality UX.

Multi-agent, multi-LLM: Role specialized agents leverage LLMs optimized for specific tasks, from UX generation to workflow orchestration and compliance traceability.

Bank-grade code quality: All outputs are Temenos code, assembled from governed, certified components and performance benchmarked for reliability and efficiency.

Enterprise security and compliance: Built to meet bank-grade standards, with industry certifications, and audit logging.

Overview of Conversational Studio benefits

	Traditional development	Conversational Studio
Timeline	6 months	90 days
Team size	9+	3
Time spent on maintenance	70%	30%
Projects	Multiple	1

You're in good company

Industry recognition

Temenos Recognized by IBS Intelligence as #1 best-selling banking software in 13 categories.

IBS Intelligence's annual Sales League Table 2025 evaluated more than 1500 banking industry deals in 2025, identifying the best-selling propositions across numerous categories.
