Upgrade Services

Upgrade Services provide a structured and controlled approach to modernizing your existing Temenos platform, ensuring you remain aligned with the latest product capabilities, technology developments and industry standards.

As systems evolve, upgrades can introduce complexity, risk, and potential disruption. Our services help you manage this transition effectively through proven methodologies, automation, and deep product expertise.

From database transformation to accelerated upgrade execution, we help you reduce upgrade effort, maintain business continuity, and unlock new functionality—ensuring your platform remains secure, performant, and ready to support future innovation.

Defined Upgrade Pathways

Upgrade activities follow structured pathways, ensuring clarity on scope, dependencies, and expected outcomes.

Controlled Transition Approach

Execution is guided through disciplined checkpoints to manage risks and ensure smooth progression during upgrades.

Stability-focused Outcomes

Post-upgrade validation ensures systems meet performance, functional, and operational expectations before stabilization.

Benefits

Reduce upgrade risk through structured methodologies and expert-led execution.

Minimize business disruption with controlled, efficient upgrade processes.

Stay current and competitive by enabling adoption of the latest platform capabilities.

Together with our partners, we have delivered hundreds of banking implementations globally in recent years —serving banks of all sizes and segments.

With proven advisory and delivery expertise, we help banks accelerate transformation, reduce risk, and unlock full value from Temenos Core, Temenos Digital and auxiliary functionality.

With our services, we empower financial institutions to transform, innovate faster, operate smarter, and deliver exceptional customer experiences.
